

Stewardship Spotlight with Roger Lewis

Head of Sustainability and
Responsible Investing at Downing LLP

maanch-invest.com

At Downing, we empower our investees to drive their own change through thoughtful dialogue, informed voting, and transparency.

Engagement is about partnership—empowering companies to achieve positive change, not dictating their actions.

Collaboration amplifies impact, especially for smaller managers with limited stakes in large companies.

Biodiversity presents a new frontier, with rules on net gain turning nature into a financial value driver.

Policy advocacy isn't just compliance—it's about shaping markets and ensuring systemic sustainability.

The term 'ESG' may evolve, but its core principles—governance, climate, and equity—are here to stay.

The Maanch Engagement Tracker brings structure to our ESG processes, consolidating content, tracking actions, and ensuring institutional accountability. **It's a game-changer for managing multiple dialogues and outcomes effectively.**
